APPLIED META-PHYSICS, THE SCIENCE OF BE-ING AND KNOWING

ESSAY: Where is God?

In the words of Alfred Tennyson
God is:

*“Closer is He than breathing, and
nearer than hands and feet.”*

Alfred Tennyson also stated:

*“Life is not as idle ore, But iron dug
from central gloom, And heated hot
with burning fears, And dipt in baths
of hissing tears, And batter'd with the
shocks of doom, To shape and use.”*

*Here, he is describing an inner
process of sounding the depths
of our be-ing and mining the
riches we find there. Burning up
the chaff of consciousness and
shaping character according to
the essential nature of the ‘raw’*

material found deep within us all.

Those who live by the intellect alone, seldom have the deep spiritual experiences or connect with the quantum ocean or the Holy Spirit, which is necessary to fully understand these statements.

Poetry has the purpose of asking every intellect to look beyond itself, to go deep within and find the real riches hidden within.

Tennyson also shared this:

*“God gives us love. Something to love
He lends us; but when love is grown
To ripeness, that on which it throve
Falls off, and love is left alone.”*

In this verse he is sharing a prophecy, a realisation he has had, that when the fullness of Love is made manifest to the consciousness, all our experienc-

es will not matter, what will matter is the fruit of those experiences, we get the fruit, the realisation of the absolute beauty of Love, when we reason over the experiences, and collate them and understand their meaning.

Alfred Tennyson's thoughts of God as a 'He', are a product of the thinking of his times. Jesus called God 'Father,' and there is a special reason for that. A man is a man until he unites with a woman and the woman bears a child, only then does the man become 'Father'.

The son makes the man a 'Father'.

This is exactly the same reasoning behind Jesus calling God 'Father.' "...This day have I begotten thee.." The realisation is

with the individual, who, on being immersed in the quantum ocean, or Holy Spirit, awakens and receives the power, which will, over the years, increase, making 'sin' diminutive in force. As sin decreases, wholeness increases, and as we regenerate, we grow wise and loving that we may attain the **crown of Everlasting Life.**

In the full consciousness of Life, there is no death.

In Hebrew we are taught that God is YHWH, the Tetragrammaton, which means 'the four letters.' These four letters are vowels, there is a 'secret' pronunciation:

Yod - inhale
He - Exhale
Waw - Inhale
He - Exhale

When a child is born onto the earth, their first breath is *Yod*, the symbol of 'et-ernal beginnings.' As *Yod* is the tiniest of letters it was used symbolically as the 'start of every letter' and therefore the start of everything. This represents God as 'the breath of Life and all existence'. God is the Unity in Diversity of everything.

This relates to God as the WORD/LOGOS. Those who say "God does not exist" are using Words to tell us that Words do not exist! Simply because they have formulated an opinion of what God 'should be, if he were to exist' and then deny that there is any evidence to support *their* supposition. *All because they do not understand their own nature, as offspring of God.*

“John 1:1 . In the beginning was the Word, and the Word was with God, and the Word was God.”

The WORDS we speak shape **everything**, they are our *power* to manifest, to choose, to shape circumstances. When we reach ever clearer states of understanding, which is thinking that is purged of material limitations, our words are charged with even greater power, because we are each a self-perpetuating, self-renewing dynamo.

Where is God?

You and I are not breathing, God is breathing through each of us, and the beginning of our breathing is determined by Divine Law, which works continually to lead us all into a greater understanding of our true nature. This is God as the breath of Life, Light and all existence.

Exactly where and when we each manifest on this earth plane is governed by Divine Law. There is an incalculable Law at work producing the events of our lives according to our motives and the purpose of existence. This is God as Law, observed by the wise and their teachings spanning millenia.

The Divine Law is becoming more evident every day, as the *mist* of time clears, and as we approach the end of this age, and the beginning of the new and everlasting covenant.

Where is God?

God is Love. Even the individual who does not believe in God, believes in and *feels* Love. They seek Love, they feel empty without Love, they will do anything for Love. Love is another Word

for God. Wherever you see True Love in action, there you are seeing God working through the individuals / creatures involved.

To know God requires we Re-Generate our thinking, and our ReGeneration depends on our awakening from the deep hypnotic state of material thinking and drawing consciously on the inner planes of the spirit and expressing the Wisdom and Love which it contains.

Where is God? God is the breath of Life, God is within. Here are a few diagrams of the Tetragrammaton, which illustrates this beautifully.

In the second image, I have superimposed the Tetragrammaton over the silhouette of the man, to illustrate that “your body is the temple of the ever living God”.

In this image I have added the Shin, the *Heart on Fyre*, an inner Fyre which makes us ‘warm hearted,’ (Urim and Thummim) and, which is the core of the Dynamic energy we can generate from the **Solar Plexus**, our Inner Sun centre.

Here is a traditional image of ‘Jesus’ according to a Caucasian interpretation, **forget the colour of the skin, that, means**

nothing. Look at His *Heart*, he is pointing to the heart and indicating that we too have this Sun Centre *WHICH GENERATES AND RADIATES LIFE ENERGY.*

It is through this inner centre of consciousness that the quantum ocean or Holy Spirit flows into us in-lightening us.

Most people do not feel it because they have not heard they are carrying it within themselves and no one has taught them how to refine their character to experience it.

Where is God? You are God, I AM God, God is EVERYTHING.

Human Be-ings:

The hu-man family are called human be-ings.

This is a further clue, which makes the fact that we are each God indubitable.

Hu - is the oldest recorded name for God

Man - is the Sanskrit word for Mind

Be - For something to Be, it means it is, it is a constant

Ing - the suffix 'ing' means 'in activity' -

Throughout his-story people have always created new Words from numerous sources in order to refine our understanding and convey deeper meaning. So this meta-physical import of the term ‘hu-man be-ing’ is not arbitrary, we can trace it etymologically and furthermore, each individual who invests the necessary time to get to know themselves can **experience the power flowing through them**, and when they do, all the words they have been reading intellectually their whole lives, will open to them and reveal a whole new meaning.

In Conclusion

Each Hu-man be-ing is God’s Mind in Activity. We are each an embodiment of the WORD and as we speak, the Word becomes

Flesh, that is, manifest all around us as circumstances, our health and events. Some people who do not believe in God say “I could make a better world than this!” I say, **“GREAT! Go ahead, that is my purpose too! - because that is why we are ALL here.”**

Applied Meta-Physics is the Science of Being and Knowing. The oldest Science in existence. Meta-Physics is the Science and art of **concealing** *Wisdom using parables, riddles, analogies, codes, koans and numerology, etc. until such a time the reader evolves and develops the necessary faculties to comprehend the teaching, at which time it becomes as clear as day. That ‘time’ is NOW.*

END

Applied Meta-Physics is the oldest Science in existence. It is the study of who we are and why we are here.

It is sometimes called 'The Science of Making the Ideal Real', because it identifies in concrete terms the abstract workings of the mind, and teaches the steps every eternal idea passes through in transition from the plane of the eternal spiritual world, to become manifest on the earth plane.

The sacred writings we have inherited are metaphysical in nature. This means they have been written through the inspiration of the Paraclete using words, which have varied meanings, interpreted accordingly, depending on which level of consciousness the reader has achieved.

The *art* of Applied Meta-Physics is to 'conceal, to reveal'. The Wisdom the writers concealed protects it from those who would destroy the writings, *and therefore destroy themselves*, until a time when the human family matured and awakened and realised its need.

The scriptures are like an offer to an addict deep in the throes of ad-diction, rejecting what they really need most, and lashing out, because they have lost control of their own minds. In the height of the loss of control the addict attacks those seeking to help them and would destroy them.

The parables, analogies, codes and koans in the Helios Biblia have preserved these writings, as the power of the Word concealed within them has worked in the hu-man consciousness to do exactly that.

Applied Meta-Physics is the Key opening the way to comprehending their riches and applying the Wisdom revealed in one's life and proving the truth thereof.

There is a simple fact of life:

We are all created equal, in that we are all the offspring of God, and we form our lives by the thoughts, words, deeds we think, speak and do. The equality is that the Divine Law is no respecter of personalities.

We are all held responsible for everything we do, and our body either regenerates or degenerates according to the motives of our hearts. If we seek to rule others, we are using the life we have been given to express ourselves contrary to the Divine Law, and this is slow and definite suicide.

If we submit to the will of another, this too is slow suicide and contrary to the Divine Law.

The LAW IS!

It is the Doorway to Everlasting Life.

PEACE.
